

Butlerib® II Wall System

Create the look and performance you want with outstanding affordability

With an attractive combination of aesthetics, performance, and affordability, the Butlerib® II wall system remains an extremely popular choice for virtually any type of building application. The Butlerib II system can be used either alone or incorporated with other materials such as brick, EIFS, and other Butler® metal wall systems for unlimited design freedom.

Choose the Butlerib II wall system to add installation speed and long-term performance for your building, whether it's a large-scale warehouse or a small retail center.

Add Beauty And Strength

Butlerib® II wall panels feature a full 1½-inch-deep corrugation for a clean, simple appearance and added strength. The panels are also available in a variety of material thicknesses, enabling you to balance the building's performance requirements with budgetary constraints.

The Butlerib II wall panels feature a 1½" corrugation for additional strength.

The Butlerib II wall panels are 3 feet wide and up to 40 feet in length, so wall installation can be completed quickly—even on large buildings.

Assure Fast And Accurate Installation

Each Butlerib II wall system panel and supporting structure is available factory punched to assure precision and speed in the installation process. A variety of fastener options can be specified depending upon the project's aesthetic and security needs, including the Butler Scrubolt™ with twice the pull-out strength of industry standard fasteners.

Add Strength And Performance

A deep 1-1/2-inch corrugation makes the Butlerib II roof panel one of the strongest standard ribbed panels in the industry. And the exclusive Butlerib II panel purlin bearing "return leg" provides added support at the panel sidelaps to withstand roof traffic.

Achieve Unmatched Design Versatility

Predesigned and factory-fabricated transition materials allow you to combine Butlerib II panels with a variety of Butler wall systems, conventional materials, doors, and/or windows without extensive field modifications.

Enhance The Beauty And Durability

All Butlerib II wall panels feature the high-quality Butler-Cote™ premium finish. Made with a 70% Kynar 500® or Hylar 5000® resin, this incredibly durable coating resists fading and chalking to remain vibrant for years, unlike typical silicone polyester paints. Many attractive standard color options are also available. The Butler-Cote finish includes a 25-year warranty against chalking and fading.

Butlerib® II Wall System

The Butler Difference

Butler Builders provide complete construction services with single-source responsibility

- Reputable professionals with extensive knowledge of local building codes

Maximize your building's performance with a complete Butler® system solution

- Innovative structural, wall and roof systems
- Precision-engineered for seamless integration

Key Benefits

- Deep 1½-inch panel corrugations add beauty and strength
- Available factory punching assures fast and accurate installation
- A variety of fasteners to meet your aesthetic and security needs
- Predesigned transition materials coordinate with other building materials
- Superior-performance Butler-Cote™ finish system (Kynar 500® or Hylar 5000®) adds beauty and protection
- 24-gauge also available in certain colors

The Butler Scrubolt™ can be specified for panel-to-structural connections vs. industry standard fasteners.
