

Butlerib® II Roof System

Assure durable roofing performance with unmatched affordability.

Assure Accurate Installation

Butlerib® II roof system panels are available factory cut and punched to assure accurate alignment and easy installation. They're secured to the supporting structural system with Butler's superior Scrubolt™ fastener or Butler's exclusive Lock-Rivet™ fastener, which does not work loose over time.

Extend Performance Life

Available factory-slotted holes allow the Butlerib II roof system's panels to expand and contract during seasonal temperature changes. This reduces stress on the panels and fasteners to extend the life of the entire roof system.

A building's roof system is no place to compromise quality and protection—particularly on projects with heightened budgetary constraints. The Butlerib® II roof system is engineered to provide the ideal option in such instances, offering low installation time and maintenance costs with the assurance of a 10-year weathertightness warranty.

Several features make the Butlerib II roof system the best through-fastened roof system in the industry. Choose this economical option to add weathertight protection to community buildings, churches, storage facilities, and more.

Add Strength And Performance

A deep 1-1/2-inch corrugation makes the Butlerib II roof panel one of the strongest standard ribbed panels in the industry. And the exclusive Butlerib II panel purlin bearing "return leg" provides added support at the panel sidelaps to withstand roof traffic.

Enhance And Protect The Beauty

All painted Butlerib II roof panels feature the high-quality Butler-Cote™ premium finish. Made with a 70% Kynar 500® or Hylar 5000® resin, this incredibly durable coating resists fading and chalking to remain vibrant for years. "Cool roof" colors are also available, which may help you qualify for LEED® credits.

Corrugations standing 1-1/2" high provide extreme durability while offering an attractive appearance

Butlerib® II Roof System

Available factory-punched structurals and panels assure accurate alignment

Exclusive Lock-Rivet™ fastener available

Deep 1-1/2-inch corrugation with purlin bearing "return leg"

The Butler Difference

Butler Builders provide complete construction services with single-source responsibility

- Reputable professionals with extensive knowledge of local building codes

Maximize your building's performance with a complete Butler® system solution

- Innovative structural, wall and roof systems
- Precision-engineered for seamless integration

Key Benefits

- Exclusive Lock-Rivet™ fastener does not work loose over time
- Available factory-slotted holes on panels allow for thermal expansion
- Deep 1-1/2-inch corrugation and purlin bearing "return leg" add strength and support
- Kynar 500® or Hylar 5000® Butler-Cote™ finish system resists chalking/fading and is backed by a 25-year warranty on painted panels
- Available 10-year weathertightness warranty underscores the performance
